Algorithm design and problem-solving

148 questions · 2016–2026 · tick each one off as you go

Q1 2016 · May/June · Paper 21 · Q4 done ☐

4 The flowchart below inputs the height of children who want to ride on a rollercoaster. Children under 1.2 metres are rejected. The ride starts when eight children have been accepted.

Complete the trace table for the input data:
